The Nickel Bulletin

INDEX

1967 VOLUME 40

Subject Index (Technical Abstracts)	343
Corrigenda	353
Subject Index (Patent Abstracts)	353
Trade-Names, Materials and Processes	356
Name Index (Technical Abstracts)	358
Name Index (Patent Abstracts)	363

INTERNATIONAL NICKEL

SUBJECT INDEX

In the Index the subjects are classified according to the section in which the items referred to appear in the Bulletin (**NICKEL, ELECTRODEPOSITION,** etc.). The reader seeking information should look first for the section covering the materials associated with the field in which he is interested and then for the appropriate sub-section (within which the items are entered in alphabetical order). The page number given is that on which the abstract containing the particular reference begins.

Trade-Names, Materials and Processes referred to in this volume are listed on page 356.

NICKEL

Analysis

: By atomic absorption spectrophotometry 110
: Determination of aluminium 146
: Determination of boron 110
: Determination of carbon 146
: Determination of chromium 110
: Determination of magnesium 110, 206
: Determination of manganese 110
: Determination of zinc 146

Determination

: In iron and steel: British Standard 206
: In phosphating solutions 110

Composition, properties and structure

Boron: influence on properties 308
Corrosion characteristics
(*see also* 'Electrochemical behaviour') 15, 35, 50, 95, 147, 166, 174, 253, 254, 262, 277, 280, 309
Diffusion of nickel in liquid copper 146
Electrical resistivity 50
Electrochemical behaviour
(*see also* 'Corrosion characteristics') 3, 51, 174, 208, 262, 280, 309
Fuel-cell electrodes: production and properties 9, 175
High-purity nickel: production 2
Irradiation creep 332
Magnetostriction 180
Mass transport of nickel in molten sodium 147
Mechanisms of hot corrosion: report of investigations 94-96
Mercury: corrosion in 174
Molten salts: corrosion in 35, 277
Molten sodium: corrosion in 147
Nickel-aluminium alloys: ordering 295
Nickel-cadmium batteries: design characteristics, performance data, selection, control, charging and servicing 3, 4, 5, 6, 7, 8, 51, 147, 234, 235, 236, 237, 238, 262, 310
Nickel-niobium phase diagram 14
Nickel-palladium alloy: cavity development during creep 127
Nickel-plated steel: corrosion fatigue 280
Nickel-vanadium-boron phase diagram 209
Organic acids: corrosion in 166, 280
Oxidation behaviour 35, 95, 111, 192, 224, 234, 309
Passivity: *see* 'Electrochemical behaviour'
Phosphorus vapour: corrosion in 50
Rare earths: solid solubility in nickel 223
Recovery of nickel deformed at low temperatures 50
Recrystallization of nickel during creep 2
Sapphire: adherence of nickel to 127
Silicon-nitride/nickel composites 28
Substructures in oxide scales 234
Sulphur solutions: corrosion in 309
Thermal and mechanical treatment: review 99
Thermophysical properties 97
Vacuum melting: influence on properties 308
Wear by hard abrasives 272
Zirconium: solid solubility in nickel 82

Nickel-clad materials

Ni/Al_2O_3 flame-sprayed coatings 79

Occurrence, extraction and refining

Winning of nickel 206

Powder production, properties and uses

(*for* nickel and nickel-alloy powders in dispersion-strengthening, *see* **HEAT- AND CORROSION-RESISTING MATERIALS: Powders and powder-produced alloys**)

Anodic oxidation of porous sintered nickel 6
Coins: production by powder-metallurgical techniques 112
Porous membranes for batteries and fuel cells: production 6, 7, 9, 175, 262
Powder metallurgy of nickel 246
Sintered compacts: properties 14, 175

Processing

Surface treatment: review 162
Thermal and mechanical treatment 99
Vacuum melting: influence on properties 308

Specifications

Analysis of nickel for use in electronic tubes and valves: *B.S.* 3727 146, 206
Photometric determination of nickel in iron and steel: *B.S.* 1121 206

Uses

(*see also* **Nickel salts and compounds,** *and* **ELECTRODEPOSITION**)

Aircraft 147
Coinage 112
Fuel cells 7, 9, 175
Marine 15, 77, 96
Storage batteries 3, 4, 5, 6, 7, 8, 51, 147, 175, 234, 235, 236, 237, 238, 262, 310

Welding, brazing and soldering

Diffusion bonding to aluminium 111
Inert-gas welding: handbook 79
Joining of nickel and nickel-base alloys: review 229

Nickel salts and compounds

(*see also* **ELECTRODEPOSITION**)

Al_3Ni whiskers: use to reinforce aluminium 245
NbNi, splat-cooled: Microcrystalline structures 310
NiAl : deformation characteristics 26, 90
: influence of oxide dispersion on properties 192
: growth of single crystals 288, 295
: slip system 26
: thermal vacancies in 325
Ni_3Al : growth of single crystals 288, 325
: phase decomposition 125
$Ni_3(Al,Ti)$: growth of single crystals 288
Nickel hydroxide 7, 8, 236
Nickel oxide: thermophysical properties 97
TaNi, splat-cooled: microcrystalline structures 310
TiNi : compatibility with mercury 256
: elastic properties 274
: martensitic transformation 274
$TiNi_3$: compatibility with mercury 256

ELECTRODEPOSITION AND OTHER COATING METHODS

Analysis of solutions and deposits

Determination of brighteners in nickel-plating solutions 82
Hydrogen: determination in nickel electrodeposits 238

Electrodeposition of alloys

18-8 stainless steel 178
Electroforming of nickel alloys 246
Nickel-cadmium alloys 54
Nickel-iron alloys 208
Nickel-tungsten alloys 114
Tin-nickel alloy 13

Electrodeposition of nickel, and properties and uses of electrodeposited nickel

Addition agents: rôle and effects 10, 13, 52, 53, 82, 83, 113, 207, 208, 263
Annealing behaviour of fine-grained electrodeposited nickel 177
Anodes: influence of sulphur, phosphorus and silicon on activity and corrosion 52
Corrosion protection conferred by electrodeposited coatings 11, 13, 23, 53, 176, 178, 180, 207, 256, 265, 293, 312
Decorative plating: review 11
Deposits varying in thickness 263
Differential capacitance 263
Double-layer and multi-layer nickel 11, 13, 207, 312
Electroforming, and properties and uses of electroformed components 13, 53, 177, 207, 246, 327
High-speed nickel plating 11, 12, 148
Hydrogen: determination in nickel electrodeposits 238
Levelling 83, 263, 264
Load-bearing structures: electroforming 13
Metallurgy of electrodeposits: review 112
Nickel-plated finishes for reduction of glare 264
Nickel plating: handbook 206
Nickel plating of brass 13, 312
Nickel/silver-plated copper wire for electrical applications 256
Plastics: nickel plating 178, 265
Production of storage batteries 51
Radioactively labelled addition agents 83, 113
Rain-erosion-resistant nickel electrodeposits 178, 311
Reflectivity of electrodeposited nickel 264
Satin-nickel plating 264
Structure of electrodeposited nickel 10, 112, 148, 177, 207, 264
Square-wave alternating current: nickel electrodeposited by 177
Sulphur: incorporation in nickel electrodeposits 208
Surface roughness 53

Other coating methods

(*see also* **HEAT AND CORROSION-RESISTING MATERIALS: Clad, faced and lined materials**)

Diffusion coating 34, 72, 135, 162, 246, 250, 276
Electroless nickel plating: continuous regeneration 114
: of brass 13
: of fibreglass 265
Electroless nickel plating: of plastics 265
: solutions 179, 180
: technique 180, 265
Gas plating *viâ* nickel carbonyl 115, 265
Vapour-deposited nickel films 28, 246

Testing

Adhesion test 265
Colour measurement 54
Corrosion testing of plated plastics 265
Electrolytic corrosion test 180
Radiotracer studies of addition-agent behaviour in nickel-plating solutions 83, 113
Reflectivity of deposits 264

NON-FERROUS ALLOYS

(*see also* **HEAT AND CORROSION-RESISTING MATERIALS**)

Analysis

Atomic absorption spectrophotometry 110
Determination of tellurium 88
Spot tests for identifying nickel alloys 273

Composition, constitution and structure

Aluminium bronze: influence of composition and cooling rate on properties 83
Chromium: influence on strength of cupro-nickels 312
Copper-nickel alloys: solidification and segregation in weld metal 197
Copper-nickel-aluminium alloys: age hardening 55
: precipitation behaviour 55
Copper-nickel-tin alloy: age hardening 313
: precipitation behaviour 313
Copper-nickel-zinc-silicon alloys: precipitation behaviour 55
Nickel-aluminium alloy 26, 111, 288
Nickel/aluminium diffusion couples 111
Nickel-copper alloys: influence of structure on elastic and magnetic properties 84
Nickel: diffusion in liquid copper 146
Nickel-niobium-aluminium alloy 310
Nickel-silicon alloys 148
Nickel-titanium alloys: influence of martensitic transformation on electrical and magnetic properties 314
Nickel-vanadium-boron phase diagram 208
Niobium-nickel phase diagram 14
Zirconium: solid solubility in nickel 82

Powder production

(*see also* **HEAT AND CORROSION-RESISTING MATERIALS: Powder Production**)

Mechanical properties of powder-metallurgically-produced materials 14

Production and processing

Casting of gunmetals 312
Casting of propellers in nickel-aluminium bronze 288
Copper-base alloys: cold working and annealing 55
Nickel-copper alloys: annealing 84

Nickel-silicon alloys: work hardening and age hardening 115
Splat cooling 310

Properties

Aluminium bronze: influence of composition and cooling rate on properties 83
Behaviour of materials in marine environments: review 253
Cavitation-erosion of pump materials 339
Copper-base alloys: influence of annealing and cold working on mechanical properties 55
Copper-nickel-aluminium alloys: electrical resistivity 55
Copper-nickel-chromium alloys 312
Copper-nickel-tin alloy: age hardening 313
Creep of complex cupro-nickels 266
Cupro-nickels 15, 55, 56, 76, 100, 101, 102, 103, 116, 149, 238, 251, 252, 253, 254, 266, 312
Deep-ocean environments: corrosion in 103, 254
Desalination plant: evaluation of materials for 100, 101, 102, 251, 252
Diffusion of nickel in liquid copper 146
Galvanic corrosion 149
Gunmetal castings 312
Impingement-resistance 56, 76
Low-temperature properties 238
Magnetic properties 84, 148, 180
Nickel/aluminium diffusion couples 111
Nickel-chromium alloys: magnetostriction 180
Nickel-cobalt alloys: magnetostriction 180
: substructures in oxide scales 234
Nickel-copper alloys 84, 238
Nickel-palladium alloys: cavity development during creep 127
Nickel-silicon alloys 148
Nickel-titanium alloys
: compatibility with mercury 256
: influence of martensitic transformation on electrical and magnetic properties 314
Nickel-yttrium alloys: oxidation 224
Phosphorus vapour: corrosion in 50
Stress corrosion of nickel silver 16
Structural hardening of complex cupro-nickels 266

Testing

Colour measurement 54
Impingement-corrosion testing 76

Uses

(*for* Uses in nuclear-energy plant, *see* **HEAT AND CORROSION-RESISTING MATERIALS: Uses**)

Brazing alloys 55
Decorative materials 54
Desalination plant (*see also* 'Marine') 56, 99, 100, 101, 102, 251, 252
Heat exchange 116
Marine (*see also* 'Desalination plant') 15, 76, 77, 103, 116, 149, 253, 254, 288, 305
Piping 116
Pumps 116, 339

Welding and brazing

Copper-nickel-zinc-silicon brazing alloys 55
Diffusion bonding between nickel and aluminium 111
Inert-gas welding: handbook 79

NICKEL-IRON ALLOYS

Composition, constitution, structure and properties (*excluding* **magnetic properties**, *q.v.*)

Electrical properties 17
Iron-nickel alloys
: electrodeposition 208
: influence of composition on martensite morphology 314
: mechanism of ausforming 289
: oxidation in carbon dioxide and carbon monoxide 18, 314
: solidification and segregation in weld metal 197
: transformation behaviour 288, 314
: wüstite scale formation 314
Iron-36%nickel alloys
: heat-treatments 17
: low-temperature applications 17
Iron-nickel-carbon alloys
: thermal stabilization of austenite 315
: transformation produced by shock loading 315
Ni-Fe-Cu-Mo alloys: long-range order 17
'NI-SPAN' alloy C-902: evaluation for Bourdon tubes 209

Magnetic properties and uses arising therefrom

77%Ni-14%Fe-5%Cu-4%Mo alloy: influence of sheet thickness on magnetic properties 316
'Alnico' alloys
: high-temperature magnetic properties 290
: influence of precipitates on hysteresis 16
Iron-nickel alloys: influence of metallic impurities on magnetic properties 289
Long-range order in Ni-Fe-Cu-Mo alloys: influence on magnetic and electrical properties 17
Soft magnetic nickel-iron alloys: development and uses 290, 291

Powder production

Nickel-iron-copper-molybdenum alloys: electrical and magnetic properties 17
Soft magnetic components from sintered nickel-iron alloys 290, 291

Production and processing

Age-hardening: influence of titanium and aluminium 57
Heat-treatment 315
Vacuum melting 209

Welding

Iron-36%nickel alloy: fabrication for cryogenic service 17

CAST IRON

Analysis

Atomic absorption spectrophotometry 110
Determination of nickel: British Standard 206
Determination of titanium 170

General

Austenitic cast irons in desalination plant 251, 252
Behaviour of materials in marine environments: review 253
Electrical resistivity 57
Influence of alloying additions on properties 117
Influence of thermal cycling on structure and thermal expansion 316
'Nicrosil': precision casting of dies in 305
Ni-hard 272
Thermal conductivity 57
Vermicular-graphite cast irons: production and properties 182

Spheroidal-graphite cast iron

Heat-treatments: influence on mechanical properties 58, 317
Austenitic S.G. iron for low-temperature service: specification 181
Behaviour of materials in marine environments: review 253
Influence of alloying additions on properties 58, 117, 317
Low-temperature properties 239
Segregation: influence on mechanical properties 116
S.G. Ni-resist: wear of seals and shrouds 193

CONSTRUCTIONAL STEELS

Analysis

Atomic absorption spectrophotometry 110
Determination of
: cobalt 84
: nickel: British Standard 206
: niobium 87
: sulphur 122
: tellurium 88

Composition, constitution and structure

1½%nickel steel: influence of chromium and molybdenum on impact strength 149
Ageing
: in iron-nickel-aluminium alloys 217
: in iron-nickel-aluminium-titanium alloy 275
: in iron-nickel-copper alloys 216
A.I.S.I. 8620 steel: cooling transformation diagram 266
Inclusions
: influence on fatigue behaviour 268, 269
: sulphide inclusions in nickel-chromium-molybdenum steel 85
Iron- and nickel-base alloys: structural refinement 267
Iron-nickel-carbon alloy: thermal stabilization of austenite 315
Maraging steels 60, 151, 321
Nickel-chromium-molybdenum steel: relation between creep elongation and intergranular cavities 19
Structure of thick-section quenched-and-tempered high-strength steels 153

Powder-produced steels

1·5%nickel-molybdenum steel 14
7%nickel-2%copper steel 14
Iron-nickel-base alloys: impact properties 25
Maraging steels: production and mechanical properties 24
Sintered low-alloy steels: fatigue properties 24
Sintered nickel- and nickel-copper steels: influence of heat-treatment on mechanical properties 25

Production and Processing
(*see also* **Welding**)

A.I.S.I. 4340 steel, coated: wear and corrosion in water 338
A.I.S.I. 4340 steel: cold drawing 119
Ausforming: *see* 'Thermo-mechanical treatment'
Case-hardening 59, 267, 268
Cold working: *see* **Properties and uses** 'Cold-worked materials'
Cutting 210, 211
Descaling 120
Explosive forming 197, 255
Forging 18, 182, 210
Heat-treatment and its effects 19, 24, 25, 59, 60, 61, 85, 86, 118, 119, 122, 149, 151, 153, 154, 182, 183, 184, 212, 213, 267, 268, 269, 271, 272, 292, 294, 315
Machining 71, 214, 322
Maraging steels 23, 24, 60, 86, 151, 184, 214, 255, 271, 292, 293, 321, 322
Melting and casting procedures and their effects 85, 86, 151, 154, 213, 266, 267, 322, 340
Nitriding 269, 271
Pressure die casting 267
Shear spinning 60, 293
Sheet-metal forming 184
Shot peening 59, 86
Straightening 210, 211
Strain ageing 271
Stress ageing 212
Thermo-mechanical treatment 213, 240, 289, 320
Thread cutting 293
Undercooling 267
Vacuum melting: *see* **Properties and uses: 'Vacuum-melted materials'**

Properties and uses
(*see also* **Welding**)

0·45%C-Ni-Cr-Mo steel: fatigue-crack propagation in gaseous environments 318
1½% nickel steel: influence of chromium and molybdenum on low-temperature properties 149
2%Cr-2%Ni-0·5%Mo steel: influence of melting practice and thermo-mechanical treatment on mechanical properties 213
2½%Ni-Cr-Mo steel: influence of strain rate on low-endurance fatigue 210
3%Ni-Cr-Mo steel: low-endurance fatigue at stress concentrations 210
5%Ni-Cr-Mo-V steel: low-cycle fatigue behaviour 59, 270
9% nickel steel 25, 183, 243, 270
9%Ni-4%Co-0·25%C steel: corrosion-fatigue-crack propagation 270
A.I.S.I. 4340 steel
: fatigue behaviour 319
: influence of cold drawing and ageing on notch strength 119
: stress corrosion 320
A.I.S.I. 8620H steel: case hardening 59
Aerospace applications 60, 154
Anodic polarization in sulphuric acid 121

Ausformed steels 240, 289
Carbon-dioxide-cooled nuclear reactor: evaluation of materials for 163-4
Case-hardening steels 59, 118, 268
Cast materials 85, 151, 213
Cavitation 120
Cold-worked materials 115, 119, 292
'Cor-Ten' steels: atmospheric corrosion 184
Cyclic-stress limits for bolts and studs 270
Deep-ocean environments: corrosion in 103, 254
Dies for drop-forging: service life 154
Fasteners 23, 60, 98, 149, 183, 270, 293
Fatigue behaviour 20, 21, 24, 59, 86, 152, 153, 182, 183, 186, 210, 268, 269, 270, 271, 292, 318, 319
Fracture toughness 21, 85, 150, 151, 268, 272, 293, 318, 321
Gears 59
High-strength steels 18, 19, 20, 21, 22, 23, 39, 59, 60, 61, 71, 85, 98, 103, 118, 119, 120, 121, 150, 152, 153, 154, 182, 183, 184, 186, 187, 210, 211, 212, 213, 214, 240, 241, 242, 254, 255, 267, 268, 269, 270, 271, 272, 292, 293, 318, 319, 320
Humid air: fatigue-crack propagation in 21, 318
HY-80 steel 118, 318
Hydrogen embrittlement 61, 120, 241, 319
Impact strength 25, 149
Iron-2·29% nickel alloy: oxidation in carbon dioxide 18
Irradiation effects 183, 292
Low-temperature properties 98, 149, 242
Maraging steels 22, 23, 24, 59, 60, 86, 87, 98, 121, 122, 150, 151, 152, 154, 214, 240, 255, 270, 271, 272, 292, 293, 321, 322, 323
Mining equipment 61
Nickel-chromium-molybdenum steel
: relation between creep elongation and intergranular cavities 19
: relation between ductility, purity, and fatigue of forgings 182
Nickel-chromium-molybdenum-cobalt-steel weld metal 61
Nickel-manganese-molybdenum steel: hydrogen absorption during cadmium plating 61
Nitriding steels 269, 271
Shear spinning: influence on mechanical properties 60
Springs 87
Strain-aged steels 271
Stress-aged steels 212
Stress corrosion 22, 23, 39, 121, 240, 255, 270, 278, 293, 320
Sulphidation corrosion 270
T-1 steel: residual stresses 210, 211
Undercooled materials 267
Vacuum-melted materials 18, 60, 61, 62, 86, 151, 154, 212, 213, 319
Wear 61, 154, 271, 272

Specifications

Photometric determination of nickel in iron and steel: *B.S.* 1121 206

Testing

Burst tests on a boiler drum 214
Fatigue testing *including* Low-cycle fatigue testing 20, 59, 210
Fracture-toughness testing 21, 150
Pressurized-box test 20
Stress-corrosion testing of foil 22

Welding and brazing

3½% nickel steel 242
9% nickel steel 183, 243, 294
A.C. welding of 9% nickel steel 243
Butt-welded low-alloy steels: fatigue strength 153
Cladding with nickel-chromium-iron alloy 186
Copper-nickel-chromium steel 214
Cracking in high-strength steel weldments 23, 86, 187, 214, 240, 272, 323
D6-AC steel: electron-beam welding 324
Fatigue behaviour 59, 152, 153
Filler metals 61, 185, 294
HY-80 steel 242
HY-130 steel 242, 323
HY-150 steel 242
Inert-gas welding: handbook 79
Maraging steels 23, 79, 86, 87, 152, 272, 293, 323, 324
Nickel-chromium-molybdenum steel: influence of composition on heat-affected-zone toughness 241
Nickel-chromium-molybdenum-cobalt steel weld metal 61
Plasma-arc welding 324
Repair welding 214
Residual stresses in welded T-1 steel plates 210, 211
Short-circuiting arc welding 242
Welding dissimilar metals 87

HEAT- AND CORROSION-RESISTING MATERIALS

(*see also* **NON-FERROUS ALLOYS**)

Analysis and identification

Atomic absorption spectrophotometry 110
Determination of
: aluminium 88
: cobalt 84
: niobium 87, 123
: sulphur 122
: titanium 170
Spot tests for identifying nickel alloys 273
Vacuum-spectrophotometric analysis 214

Clad, faced and lined materials, including sprayed metals (*see also* **Welding and brazing**)

Cladding by submerged-arc welding 230
Clad steels: fabrication using 342
Coating for protection against stress corrosion 137
Coated nickel-base alloys: fatigue behaviour 217
Coating and mechanical treatments applied to nickel-base alloys 162
Diffusion coating 34, 72, 135, 162, 246, 250, 276, 330, 338
Embrittlement of overlay cladding 257
Hard facing of nickel and nickel-base alloys 162
Nickel/silver-plated copper wire 256
Sprayed metals 79, 137, 246

Composition, constitution and structure

(*see also* **Powders and powder-produced alloys** *and* **Welding and brazing**)

18-8 austenitic steel
: cyclic martensitic transformation in 328
: identification of thin oxide films 225

23-13 steel: influence of silicon, boron and nitrogen on oxidation-resistance 225
Alloying with nickel, chromium and molybdenum: influence on corrosion-resistance 249
Chromium depletion in stainless steels 304
Deformability of austenitic stainless steels 141
Delta ferrite: behaviour during quenching of stainless steels 62
Dislocations in stainless steels: influence on stress-corrosion cracking 167
Gas-turbine alloys: development 92
Grain-size: influence on life of heat-treatment baskets in 'INCONEL' alloy 600 162
Grain-size of MC-102: influence of casting conditions 331
High-temperature sheet alloys: metallurgical properties and development 131
Hydrostatic pressure: influence on γ' precipitation in 'René' 41 126
Influence of composition and/or structure on corrosion behaviour 34, 37, 38, 39, 40, 92, 96, 101, 102, 103, 135, 138, 139, 140, 147, 157, 165, 166, 167, 168, 169, 222, 224, 225, 226, 227, 228, 249, 250, 253, 254, 256, 277, 279, 280, 304, 332, 334, 336
Influence of composition and/or structure on mechanical and physical properties 26, 28, 29, 41, 42, 65, 66, 70, 72, 89, 90, 97, 104, 125, 126, 127, 131, 132, 133, 141, 155, 156, 157, 158, 159, 160, 162, 188, 189, 190, 192, 195, 215, 218, 219, 230, 248, 275, 297, 301, 302, 325, 327, 329, 331, 332, 334
Influence of composition and/or structure on oxidation behaviour 34, 35, 95, 111, 123, 129, 136, 139, 163, 164, 224, 225, 234, 276, 304, 314
Influence of composition on structure 30, 63, 89, 124, 155, 156, 157, 158, 159, 188, 189, 190, 296, 297, 314, 328, 334
Influence of heat-treatment or high-temperature exposure (*including* creep testing) on structure 26, 27, 28, 29, 30, 31, 41, 62, 63, 70, 89, 90, 124, 126, 127, 130, 136, 155, 157, 158, 189, 190, 216, 217, 218, 219, 221, 248, 257, 275, 276, 295, 297, 299, 300, 301, 315, 328, 329, 334, 336
Iron-chromium-nickel-carbon alloy: carburization and irreversible transformation 158
Iron-14%nickel-9%manganese-4·5%titanium alloy: structure and properties 89
Iron-20%nickel-15%chromium alloys: structure and properties 156
Iron-26%nickel-0·4%carbon alloy: influence of deformation on M_s 196
Iron-nickel alloys: influence of composition on martensite morphology 314
Iron-nickel-carbon alloys
: thermal stabilization of austenite 315
: transformation produced by shock loading 315
Laves phase 188
MAR-M200
: carbide phases in 301
: precipitation hardening in 302
NiAl : deformation characteristics 26, 90
: growth of single crystals 288, 295
: slip system in 26
: thermal vacancies in 325
Ni_3Al : growth of single crystals 325
: phase decomposition in 125
Nickel/alumina interface: thermal-etching study 325
Nickel-aluminium alloys: structure 27, 125, 295
Nickel-base age-hardenable superalloys: microstructures 125
Nickel-cobalt-chromium-aluminium-titanium-carbon alloys 124
Nickel-palladium alloy: cavity development during creep 127
Nickel-titanium steels: strengthening mechanisms in 329
Niobium carbide: solubility in 20-25-Nb steel 187
Nitrogen: precipitation behaviour in stainless steel 276
Oxide and corrosion films: structure and composition 111, 123, 234, 304
PHACOMP analysis to predict sigma formation 124
Precipitation
: in copper-nickel-iron alloys 299
: in copper-nickel-zinc-silicon alloys 55
: in 'Hastelloy' C 136
: in heat-resisting Ni-Cr-Mo steels 188
: in iron-nickel-aluminium alloys 217
: in iron-nickel-aluminium-titanium alloys 275
: in iron-nickel-copper alloys 216
: in Ni_3Al 125
: in nickel-aluminium alloys 26, 27, 125
: in nickel-base superalloys 125
: in nickel-chromium-aluminium alloys 124
: in nickel-chromium-cobalt alloys 189
: in nickel-chromium-cobalt-molybdenum alloys 189
: in nickel-cobalt-base alloys 131
: in precipitation-hardenable steels and alloys 29, 155, 156, 302, 328
: in 'Pyromet' 860 127
: in 'René' 41 126
: in stainless steels 29, 30, 31, 63, 157, 187, 188, 189, 276, 296, 297, 320
Recrystallization of stainless steel: influence of hot-working 190
Recrystallization of 'TD' nickel 244
Refractories: stability for melting nickel-base alloys 273
Sigma phase 31, 124, 188, 190, 230, 257, 296
Slip steps in stress-corrosion cracking of iron-nickel-chromium alloys 254
SLIS techniques for dispersion hardening 223
Solidification and segregation in iron-nickel and copper-nickel-alloy weld metals 197
Strain ageing: effects on structure 41
Sulphides in stainless steels: composition of 328
Sulphur: influence on corrosion-resistance of stainless steels 279
Superplasticity in nickel-iron-chromium system 159
Thoria-dispersion-hardened nickel: fatigue and tensile fracture 327
TiNi: martensitic transformation 274
Titanium: hardening of Fe-20%Ni-15%Cr alloys 156
Transformation reactions 158, 315, 328, 329
Z-phase in chromium-nickel-niobium steels 296

Powders and powder-produced alloys

Dispersion strengthening 28, 29, 32, 92, 158, 192, 243, 244, 246, 325, 326, 327, 333
Fibre reinforcement 192, 245, 327
Internal carburization of TiC-dispersion-strengthened nickel 158
Nickel/ceramic composites and dispersion-strengthened nickel for gas-turbine applications 333

Particle size: influence on strength of dispersion-hardened alloys 158
Precipitation-hardenable steels: production by powder metallurgy 215
Silicon-nitride/nickel composites 28
Sintered stainless steels and nickel-base alloys: mechanical properties of commercially produced grades 14
Sintered stainless steels
: corrosion-resistance 103, 140, 215
: impact properties 25
: wear-resistance 215
Sintered tungsten-nickel-iron alloys: tensile properties 160
Sintered turbine blades in nickel-base alloys 222
Stainless-steel powders: effects of composition and processing variables on properties 215
Thermal-etching study of nickel/alumina interface 325
Thoria-dispersion-hardened nickel
: fatigue and tensile fracture 327
: high-temperature tensile properties 32
: properties of hot-pressed alloys 326
: recrystallization 244
Tungsten-wire-reinforced nickel-base alloys 192

Production and processing

Plasma-arc cutting and piercing 342
Pressure casting of tubes 306
Punching 342
Splat cooling 223
Strain ageing 41, 326, 331
Surface preparation and surface condition: effect on oxidation behaviour, corrosion behaviour, or physical or mechanical properties 162, 196, 214, 218
Thermo-mechanical treatment 141, 240, 320
Undercooling 267

Properties

A. Corrosion- and oxidation-resistance

15-5 P.H. steel: properties 334
18-10 austenitic steel coupled with nickel, copper, or aluminium: corrosion 227
19-14-3·5Mo stainless steel: anodic protection 228
23-13 steel: influence of silicon, boron, and nitrogen on oxidation-resistance 225
Acids: corrosion behaviour in contact with 51, 121, 166, 226, 227, 262
Automobiles: smog-control devices in 226
Behaviour of materials in marine environments: review 253
Beryllium coatings for corrosion protection of nickel-base alloys 37
Braze coatings 250
Carbon dioxide: corrosion in 163, 336
Carburization 158, 335, 336
Cast materials 34, 35, 36, 72, 227, 273, 334
Cavitation 96, 120, 339
Chromium-aluminium protective coating for superalloys and stainless steels 38
Combustibility of nickel in oxygen 111
Condenser tubing: evaluation of materials for 15
Corrosion-erosion 15, 101
Corrosion fatigue of nickel-plated steel: influence of internal stress 280
Cold-worked materials 169, 196
Crevice corrosion 338
Cupro-nickels: *see* **NON-FERROUS ALLOYS**
Deep-ocean environments: corrosion in 103, 254
Desalination plant: materials for use in 100, 101, 102, 251, 252
Diffusion coating of alloys for gas turbines 34
Dislocations in stainless steels: influence on stress-corrosion cracking 167
Electrochemical studies 3, 51, 77, 78, 95, 121, 140, 165, 167, 174, 194, 195, 226, 227, 228, 262, 278, 279, 280, 337
Exhaust gases: corrosion in 38, 226, 250
Explosive forming: influence on properties 197
Fasteners: evaluation of materials for 98
Fuel-ash corrosion 34, 35, 36, 37, 92, 95, 96, 135, 163, 222
Galvanic corrosion 149, 227, 228, 229, 253, 338
Gas-turbine alloys: corrosion 35, 36, 92, 134, 163, 222, 332
Grain-boundary corrosion 229
Growth of nickel-oxide films during oxidation of nickel 111
Heat-resisting steels 70, 72, 225
High-pressure hydrogen: embrittlement of stainless steel 277
High-temperature corrosion and evaporation of superalloys in helium 164
Hot-working scale 225
Hydrogen embrittlement 39, 277, 278
Hydrogen: influence on stress-corrosion behaviour 39
Impingement resistance 56, 101
IN-102 32
'INCOLOY' alloy 800 in petrochemical industry: review 73
'INCONEL' alloy 718: accelerated corrosion testing in boiling sea-water 305
Intergranular corrosion 42, 72, 78, 136, 139, 157, 166, 230, 279, 304, 336
Iron-nickel alloys: wüstite scale formation on 314
Iron-nickel-chromium alloys: slip steps in stress-corrosion cracking 254
Marine-gas-turbine regenerators: evaluation of materials for 333
Mechanisms of hot corrosion: report of investigations 94-6
Mercury: corrosion in 174, 256
Methane: corrosion in 164, 166
Methane steam-reforming plant: evaluation of materials for 166

Molten metals: corrosion in 72, 96, 146, 147, 229, 335
Molten salts: corrosion in 35, 277
Molybdenum-containing stainless steels 226
NiAl: dispersion strengthening of 192
Nickel-aluminium alloys 304
Nickel-base alloys in sulphonation plant 74
Nickel-base superalloys: coating for protection against sulphidation corrosion 37
Nickel-yttrium alloys: oxidation at 1200°C 224
Nitrogen-containing austenitic stainless steels 42, 225, 226
Octel corrosion tests on manganese-chromium-nickel stainless steels 250
Organic acids: dissolution of nickel-base alloys in 166, 280
Oxidation behaviour and resistance 34, 35, 72, 95, 111, 123, 129, 130, 131, 139, 163, 164, 192, 224, 225, 230, 234, 276, 304, 309, 314, 332
Oxide films: protection against corrosion by molten salts 35
Passivation behaviour: *see* 'Electrochemical studies'
Phosphoric acid: stainless steels for service with 338
Phosphorus vapour: corrosion in 50
Pitting corrosion 78, 140, 279
Precipitation-hardening steels 38, 137, 250, 254, 320, 334
Rain: erosion in 178, 311
Reformer-furnace alloys: metallurgy and operating experience 72
Refractories: reaction with nickel-base-alloy melts 273
Sea-water: corrosion in 15, 36, 40, 75, 76, 92, 96, 98, 101, 102, 103, 149, 163, 165, 227, 250, 252, 253, 254, 255, 305, 333
Sensitization and thermal stability of 'Hastelloy' C 136
Sintered stainless steels 103
Sodium: carburization of Type 304 stainless steel in 335
Stainless steel in chemical plant: review 74
Stainless-steel paints: corrosion protection afforded by 141
Stainless steels: influence of stabilizing heat-treatment on intergranular corrosion 166
Stainless steel in wine industry 75
Steam: corrosion in 72, 277
Stress corrosion 13, 16, 22, 23, 38, 39, 42, 75, 98, 101, 121, 137, 138, 152, 166, 167, 168, 169, 195, 196, 226, 240, 250, 253, 254, 255, 270, 278, 279, 293, 320
Sulphidation corrosion 34, 35, 36, 37, 72, 92, 95, 134, 135, 163, 222, 270, 309
Sulphur: influence on corrosion-resistance of stainless steel 279
Sulphuric acid: stainless steels for service with 338
Sulphur solutions: reaction of nickel with 309
Tunnel formation 195, 280
Type 304 steel wire: influence of nitriding on stress-corrosion cracking 168
Vacuum-melted materials 228, 273
Water: corrosion of chromium-nickel stainless steels in 338
Wire rope 254

B. Mechanical and physical properties

15-5 P.H. steel 334
15-35 steel: influence of carbon content on creep behaviour 66
17-12-Mo steel: effects of thermo-mechanical treatment 141
20-25-Nb steel
: embrittlement of irradiated material 64
: low-endurance fatigue behaviour 218
30-20 chromium-nickel-iron-alloy furnace tubes: influence of nitrogen on cracking 334
Ageing behaviour 29, 30, 41, 57, 89, 99, 104, 115, 125, 127, 155, 156, 188, 189, 216, 217, 229, 248, 275, 299, 331
Al_3Ni-whisker-reinforced aluminium 245
AM-350 steel: crack propagation at stresses below the fatigue limit 161
Austenitic stainless steel
: influence of molybdenum on precipitation hardening 29
: determination of proof stress 68
Boron: influence on creep of iron-4%nickel-16%chromium-3%molybdenum alloy 248
Cast materials 34, 70, 72, 90, 132, 133, 190, 215, 267, 275, 303, 330, 331
Cold-worked materials 30, 32, 66, 68, 69, 99, 115, 131, 134, 156, 191, 196, 218, 244, 274, 296, 306, 340
Copper-nickel-iron alloys: fatigue behaviour 299
Creep and creep-rupture behaviour 28, 32, 65, 66, 67, 70, 90, 92, 127, 128, 132, 133, 155, 157, 159, 160, 188, 189, 191, 192, 215, 221, 222, 245, 247, 248, 275, 297, 300, 301, 302, 303, 331, 332
Cryoformed Type 301 stainless steel 97
Cupro-nickels: *see* **NON-FERROUS ALLOYS**
Dies for drop forgings: service life 154
Dispersion-strengthened materials 28, 29, 72, 158, 223, 333
Electrical properties of flame-sprayed Ni/Al_2O_3 coatings 79
Electrical resistivity 155
E.M.F./temperature characteristics of nickel-base-alloy thermocouples 249
Explosive forming: influence on properties 197
Extrusion dies: nickel-chromium heat-resistant alloys for 33
Fasteners: evaluation of materials for 98, 229
Fatigue behaviour 33, 41, 59, 67, 116, 160, 161, 191, 196, 217, 218, 219, 220, 221, 245, 298, 299, 303, 327, 329, 330
Fibre-reinforced materials 192, 245, 327
Fracture properties 67, 160, 161, 162, 218, 327, 334
Gas-turbines: surveys of operating experience 134, 332
'Hastelloy' X: tensile properties 32
Heat-resisting steels 29, 30, 64, 65, 66, 67, 72, 157, 187, 188, 190, 218
Heat-treatment of nickel-base superalloys: review 275
High-proof-stress austenitic stainless steels 256
Hot-worked materials 32, 42, 99, 190, 196, 274
Hydrogen embrittlement 277
Hydrogen permeability of Type 310 stainless steel 278
IN-102 32
'INCOLOY' alloy 800: in petrochemical industry: review 73
'INCOLOY' alloy 800: thermal fatigue 330
'INCONEL' alloy 718
: forging and solution-treatment 70
: influence of electroflux melting on properties 247
: influence of heat-treatment on notch-rupture ductility 300
: metallurgy of, review 301
'INCONEL' alloy X-750: influence of heat-treatment on notch-rupture ductility 300
Iron-26%nickel-0·4%carbon alloy: influence of deformation on M_s 196
Iron-nickel-aluminium alloys: influence of heat-treatment on structure and properties 217
Iron-nickel-copper alloys: influence of heat-treatment on structure and properties 216

Irradiation creep of nickel and nickel-containing materials 332
Irradiation embrittlement of 20-25-Nb austenitic steel 64
Low-temperature properties 42, 97, 98, 230, 257
Marine-gas-turbine regenerators: evaluation of materials for 333
MAR-M200: tensile and creep properties of single crystals in 302
MC-102
: influence of casting conditions on tensile and stress-rupture properties 331
: influence of heat-treatment and composition on tensile properties 275
Matrix strengthening in 'INCONEL' alloy 718 301
Molybdenum: precipitation hardening of austenitic steel by 29
'MONEL' alloy K-500, age-hardened: fatigue behaviour 41
NiAl : dispersion strengthening in 192
: mechanism of deformation at high temperatures 90
Ni_3Al: flow stress in 325
Nickel-base sheet superalloys 131
Nickel-base superalloys
: influence of high-temperature exposure on tensile properties 91
: influence of microstructure on mechanical properties 126
Nickel-chromium alloys: fracture behaviour 67, 160
Nickel-chromium-cobalt alloys: low-cycle fatigue 329
Nickel-chromium-cobalt-titanium alloys: evaluation for drop-forging dies 154
Nickel-cobalt-base alloys: precipitation hardening 131
Nickel-molybdenum alloys: influence of magnetic transformation on electrochemical behaviour 195
Nickel-titanium steels: strengthening mechanisms 329
'NIMONIC' alloy 80A: activation energy for creep 66
'NIMONIC' alloy 90: correlation of creep and fatigue data 191
: ultrasonic testing of forgings in 71
'NIMONIC' alloys 90 and 105: prediction of comparative thermal-fatigue behaviour 220
Niobium-containing cobalt-base casting alloys, development of 132
Ni-resist: thermal conductivity and electrical resistivity 57
Nitrogen-containing austenitic stainless steels 42, 215, 256, 297
Precipitation-hardening steels 29, 89, 155, 156, 215, 248, 320, 334
Non-magnetic stainless steels for marine applications 75
Pressure-vessel steels: mechanical properties 68
'Pyromet' 86: influence of ageing on mechanical properties 127
Rain: erosion in 178, 311
Reformer-furnace alloys: metallurgy and operating experience 72
Refractories: wetting by nickel-base-alloy melts 273
'René' 41: high-temperature tensile properties 32
Resistance-heating alloys: high-temperature tensile properties 130
Sapphire: adherence of Ni-Cr and Ni-Ti alloys to 127
Seals and shrouds: evaluation of materials for 193
Sheet alloys for gas turbines 131, 221
Sintered stainless steel 25
Sintered turbine blades in nickel-base alloys 222
Specific heat 32, 274
Stainless-steel tubing 170, 196
Strain-aged iron-nickel-carbon austenites 41
Superplasticity in nickel-iron-chromium system 159
Thoria-dispersion-hardened nickel
: fatigue and tensile fracture 327
: high-temperature tensile properties 32
: recrystallization 244
Thermal expansion of stainless steels at low temperatures 257
Thermal-fatigue behaviour 34, 162, 219, 220, 221, 303, 330
Thermal and mechanical treatment of nickel-base alloys: review 99
Thermophysical properties 97
TiC-dispersion-strengthened austenitic steel 29
TiNi: elastic properties 274
Tungsten-nickel-iron heavy alloys: tensile properties 160
Type 316 stainless steel: influence of structure on creep properties 65
'Udimet' 700: closed-die forging 69
Undercooled materials 267
Vacuum-melted materials 18, 66, 132, 196, 248, 273, 329
Wear 154, 193, 229, 272, 338, 339

Specifications

Stainless-steel surgical wire: *B.S.* 4106 141
Stainless-steel tubes for plumbing and heating: *B.S.* 4127 170

Testing

Accelerated corrosion testing 305
Colour measurement 54
Dynamic creep 160
Fatigue testing 217, 298, 330
High-temperature tensile testing of superalloy sheet 32
Impingement-corrosion testing 76
Irradiation creep 332
Octel corrosion test 250
Spinning-source mass spectrograph microprobe 123
Ultrasonic testing of turbine discs in 'NIMONIC' alloy 90 71

Uses

Uses grouped in this sub-section are individually referred to in the **Properties** sub-section, in relation to the properties which render the materials suitable for the respective applications.

Aircraft, *including* Structural uses *and* Rockets and missiles (*see also* 'Gas turbines') 32, 33, 70, 96, 98, 132, 137, 169, 193, 247, 250, 256, 278, 305
Automobile industry 226, 250
Bearings 193, 338
Chemical, petrochemical and petroleum industries 72, 73, 74, 166, 184, 190, 257, 338
Desalination plant (*see also* 'Marine applications') 56, 99, 100, 101, 102, 165, 251, 252, 255
Domestic water applications 42, 170
Electrical applications 130, 170, 249, 256
Extrusion dies 33
Fasteners 98, 229, 293
Fertilizer industry 338
Food industry 334
Gas turbines 34, 35, 36, 37, 69, 71, 72, 90, 92, 94, 95, 96, 132, 133, 135, 163, 192, 193, 220, 221, 222, 248, 273, 276, 302, 304, 332, 333
Glass manufacture 338

Heat exchange 74, 116, 255, 333
Heat-treatment baskets 162
Low-temperature applications 105
Marine applications (*see also* 'Desalination plant') 15, 35, 36, 72, 75, 76, 77, 92, 96, 103, 116, 135, 149, 227, 253, 254, 273, 305, 333, 338
Nuclear-power plant 72, 91, 123, 128, 129, 130, 163, 164, 165, 167, 187, 193, 230, 336, 338
Paper manufacture 228, 338
Pumps 96, 116, 334, 339
Steam-reforming plant 72, 166, 190, 334
Stainless steel in the wine industry 75
Wire 141, 170, 256

Welding and brazing

17-7 P.H. steel: influence of shielding atmosphere on retained delta ferrite 341
Braze coatings 250
Brazing alloys 230, 333
Brazing stainless-steel tubing 42
Clad steels: welding 342
Covered electrodes for welding stainless steel: review 341
Cracking in weldments 104, 190, 331, 341
Diffusion bonding 105, 111, 257
Embrittlement of weld metal 229, 257
Hard facing of nickel and nickel-base alloys 162
Inert-gas welding: handbook 79
Joining of nickel and nickel-base alloys: review 229
Low-temperature properties of welded joints 230
Nitrogen-containing austenitic stainless steels: welding electrodes for 42
Plasma-arc cutting and piercing 342
Plasma-arc welding 258, 324
Sealing tubes by resistance welding 342
Solidification and segregation in weld metals 197
Submerged-arc welding 142
Stress-corrosion behaviour of weldments 38, 169
Weld-fusion behaviour 258
Welding dissimilar metals 105, 229, 257, 341

CORRIGENDA TO VOLUME 40

Issue No. 1-2, p. 47.
Chromium-nickel stainless steel for canning nuclear-reactor fuel rods, line 5.
For chromium 16·5-17·55,
Read chromium 16·5-17·5.
Ibid., line 9.
For vanadium 0·15,
Read vanadium 0·15 max.
Issue No. 4, pp. 83-4.
B.S. 1400: AB2 aluminium bronze: influence of composition and cooling rate on properties, footnote on p. 83, line 2.
For manganese $\geqslant$1·5, zinc $\geqslant$0·50, per cent,
Read manganese $\leqslant$1·5, zinc $\leqslant$0·50, per cent.
Issue No. 4, pp. 92-4.
Development of high-temperature alloys for marine gas turbines, table on p. 93, column 12.
For Zn %,
Read Zr %.

Issue No. 6, p. 147.
Sealed nickel-cadmium batteries for aircraft, first abstract.
For *U.S. Air Force, Report AFAFL-CONF-66-3,*
Read *U.S. Air Force, Report AFAPL-CONF-66-3.*

Ibid., second abstract.
For *U.S. Air Force, Report AFAFL-CONF-66-6,*
Read *U.S. Air Force, Report AFAPL-CONF-66-6.*

Issue No. 8, p. 208.
Anodic behaviour of nickel in thiourea-containing chloride nickel-plating solutions
For L. L. SCHREIR,
Read L. L. SHREIR.

Issue No. 10, p. 271.
Strain ageing of A.I.S.I. 4340 steel tempered below 400°F, line 9.
For carbon 0·04,
Read carbon 0·40.

PATENTS: SUBJECT INDEX

The titles of the patent abstracts are classified below according to the material or field to which the patent relates.

Nickel

Nickel coating of steel strip 105
Nickel particles coated with aluminium and nickel-boron alloy for flame spraying 281
Nickel particles: production for use in alkaline-battery plates 281

Electrodeposition and Other Coating Methods

Bright-nickel/chromium corrosion-resistant electrodeposits 198
Bright-nickel/microporous-chromium deposits on components of complex shape 43
Decorative nickel electrodeposits 198
Multi-layer nickel electrodeposits 281
Nickel coating of steel strip 105
Nickel electrodeposited with controlled internal stress by anodic oxidation 198
Satin-nickel electrodeposits with fine grain 106
Surface treatment of electrodeposits to improve adherence 43

Non-Ferrous Alloys

Cobalt-aluminium-nickel-alloy permanent magnets with high coercive force 106
Copper-nickel alloys containing titanium with high hot ductility 106
Nickel-aluminium-alloy/oxidant composition for retarded detonators 47
Nickel-copper-alloy welding wire 203
Nickel-magnesium addition alloy produced by powder metallurgy 106
Nickel-silicon-titanium-copper-molybdenum casting alloys resistant to sulphuric acid 47

Nickel-Iron Alloys

Iron-80% nickel alloy: production of permanent magnets in 198
Iron-nickel-aluminium low-cobalt permanent-magnet alloy with good magnetic properties 199
Iron-nickel-cobalt glass-to-metal sealing alloys 43

Cast Iron

Cast iron flame-sprayed with a nickel-base alloy 108
Coated electrode for cold welding cast iron 202
Nickel-containing cast iron for piston rings 43

Constructional Steels

9% nickel steel
: arc welding for cryogenic service 203
: automatic submerged welding 203
: electrode for welding 282
: with reduced susceptilibity to hot-shortness 282
9% nickel-molybdenum-(copper) steel for turbine wheels 282
Air-hardening bearing steel 109
Cored welding electrode for welding high-strength steels 283
High-strength low-alloy-steel filler metal 202
High-strength steels: electrode or filler metal for arc welding 48
Maraging steels
: filler metal for welding 12% nickel maraging steel 203
: improving adherence of electrodeposits to 43
: manganese-containing maraging steel 44
: nickel-chromium-molybdenum maraging-steel filler wire 48
: nickel-copper-molybdenum maraging steel 282
Nickel-chromium-molybdenum-vanadium cast steel for primary breakdown rolls 44
Nickel-cobalt-chromium-molybdenum steel with high yield strength and good toughness 282
Nickel-containing steel for cryogenic applications 281
Nickel-containing steel with high yield strength and good notch toughness 282
Nickel-manganese-steel wire for welding low-alloy high-strength steels 282
Nickel-manganese-steel weld deposit with high strength and toughness at cryogenic temperatures 48
Nickel-manganese-vanadium-aluminium-nitrogen low-alloy steel with high impact strength at low temperatures 44
Selective age-hardening 282

Heat- and Corrosion-Resisting Materials

18-37 heat-resisting steel resistant to cracking during casting and welding 200
Austenitic stainless steel containing niobium with increased strength in the annealed condition 202
Austenitic stainless steels containing nitrogen 201, 285
Austenitic stainless steel resistant to stress-corrosion cracking 285
Baroni beam 106, 197
Chromium-manganese-nickel-nitrogen austenitic pressure-vessel steel 201
Chromium-nickel-aluminium precipitation-hardenable semi-austenitic stainless steel 201
Chromium-nickel austenitic stainless steel
: containing boron and zirconium to facilitate cold pressing 202
: containing nitrogen 46, 285
: for ship construction 202
: with good creep-resistance 284
Chromium-nickel cast steel for furnace tubes 108
Chromium-nickel-copper precipitation-hardenable stainless steel 201
Chromium-nickel-manganese austenitic-steel for making Fourdrinier wire belting 285
Chromium-nickel-manganese heat-resisting austenitic steel 46, 284
Chromium-nickel-nitrogen austenitic steels resistant to pitting in sea-water 285
Chromium-nickel precipitation-hardenable stainless steels 45
Chromium-nickel stainless steel for canning fuel rods 47, 200
Coated electrode for cold welding cast iron 202
Cobalt-chromium-nickel-base alloys with good corrosion- and wear-resistance 202
Copper-nickel-base corrosion-resistant thermocouple alloys 44
Copper nickel-iron-zinc-aluminium cast alloy resistant to corrosion 47
Dispersion-hardenable nickel-containing alloy 199
Fully austenitic stainless steel with high creep resistance, resistance to sensitization and good weldability 46
Hafnium-containing nickel-base high-temperature alloys with improved weldability 283
Iron-nickel-chromium alloy with good high-temperature creep and stress-rupture properties 283
Iron-nickel-chromium-cobalt-base alloy for wrought reformer-furnace tubes 199
Low-copper 17-4 martensitic steel with good corrosion-resistance 47, 108
Low silicon chromium-nickel stainless steel with high strength and sharp-notch ductility 46
Manganese-nickel-chromium non-magnetic precipitation-hardened steel with high impact strength 200
Martensitic age-hardenable stainless steel with high strength and corrosion-resistance 200
'MONEL' alloy 400: welding electrode for 286
Nichrome/chromia coating with high wear resistance at elevated temperatures 108
Nickel-aluminium-alloy/oxidant composition for retarded detonators 47
Nickel-base alloy: flame spraying onto cast iron 108
Nickel-base alloy for producing welds not requiring heat-treatment between heat-resisting steels 204
Nickel-base alloy with high strength and oxidation-resistance at elevated temperatures 107
Nickel-base brazing alloy 286
Nickel-base gas-turbine alloy with high strength and ductility at room and elevated temperatures 107
Nickel-base gas-turbine casting alloy 283

Nickel-chromium alloy resistant to fuel-ash corrosion 284
Nickel-chromium-base alloys with good wear resistance and hot hardness 106
Nickel-chromium-cobalt-base age-hardenable alloy resistant to sigma embrittlement 107
Nickel-chromium-cobalt-base age-hardenable gas-turbine alloys 283
Nickel-chromium-cobalt-base alloys for wear-resisting cast machine components 45
Nickel-chromium-cobalt-base gas-turbine alloy: Heat treatment 44
Nickel-chromium-cobalt-iron precipitation-hardening alloy 284
Nickel-chromium-cobalt-tungsten high-temperature casting alloy 199
Nickel-chromium high-strength martensitic stainless steel 285
Nickel-chromium-(iron) alloy resistant to stress-corrosion cracking in high-temperature high-pressure water 284
Nickel-chromium-iron-base alloy with high strength at elevated and cryogenic temperatures 283
Nickel-chromium-manganese free-machining austenitic stainless steel 286
Nickel-chromium-molybdenum-iron oxidation-resistant alloy 284
Nickel-chromium-molybdenum-tantalum-cobalt-base gas-turbine alloy 107
Nickel-chromium precipitation-hardenable austenitic steel: electrode for welding 48
Nickel-chromium precipitation-hardenable martensitic steel containing beryllium 200
Nickel-chromium-tungsten alloy resistant to thermal shock and high-temperature corrosion 45
Nickel-chromium-tungsten-base high-temperature casting alloy 199
Nickel-containing alloys and steels: flux for submerged-arc welding 204
Nickel-silicon-titanium-copper-molybdenum casting alloys resistant to sulphuric acid 47
Nickel-tungsten-tantalum alloy resistant to corrosion in highly oxidizing media 45
Precipitation-hardenable stainless steel: synthetic-fibre spinnerets from 201
Stainless steels and nickel-base alloys: brazing alloys for 286
Stainless steels: CO_2-shielded bare-wire electrode for 204
Stainless steel with low work-hardening rate 285
Thorium-containing nickel-base superalloys with high strength and ductility 107
